

**IRVINE RANCH WATER DISTRICT  
DIRECTOR**

**ANNIE YANG-MCNALLY**

**OCCUPATION:** Process Engineer/Environmental Law Specialist

The Irvine Ranch Water District is an independent public agency providing high quality water and sewer services to over 300,000 residents. IRWD is one of the nation's most forward thinking and environmentally sound water districts.

As our wonderful community continues to grow, we must ensure that the growth is clean and smart. As a member of the Board of Directors, I will take decisive actions to protect our families with safe, available water, safeguard our water resources, maintain a high quality of service, and keep the water in our community affordable. I will put a strong emphasis on the "Three R's" of water conservation: Reduction, Reclamation, and Replenishment. We must explore new technologies in water saving devices and projects, and secure new water resources.

You want a person on the Board who, by training and experience, is qualified to make informed decisions regarding water management for the community. I have a Master's degree in Materials Science and a Bachelor's degree in Mechanical Engineering, and currently am serving with the Environmental Section of the Attorney General's Office. I am fluent in Chinese and English.

Please vote for Annie Yang-McNally, working to keep our water clean, our community green and beautiful.
